# Jaga Penny USB Driver Install with Zadig
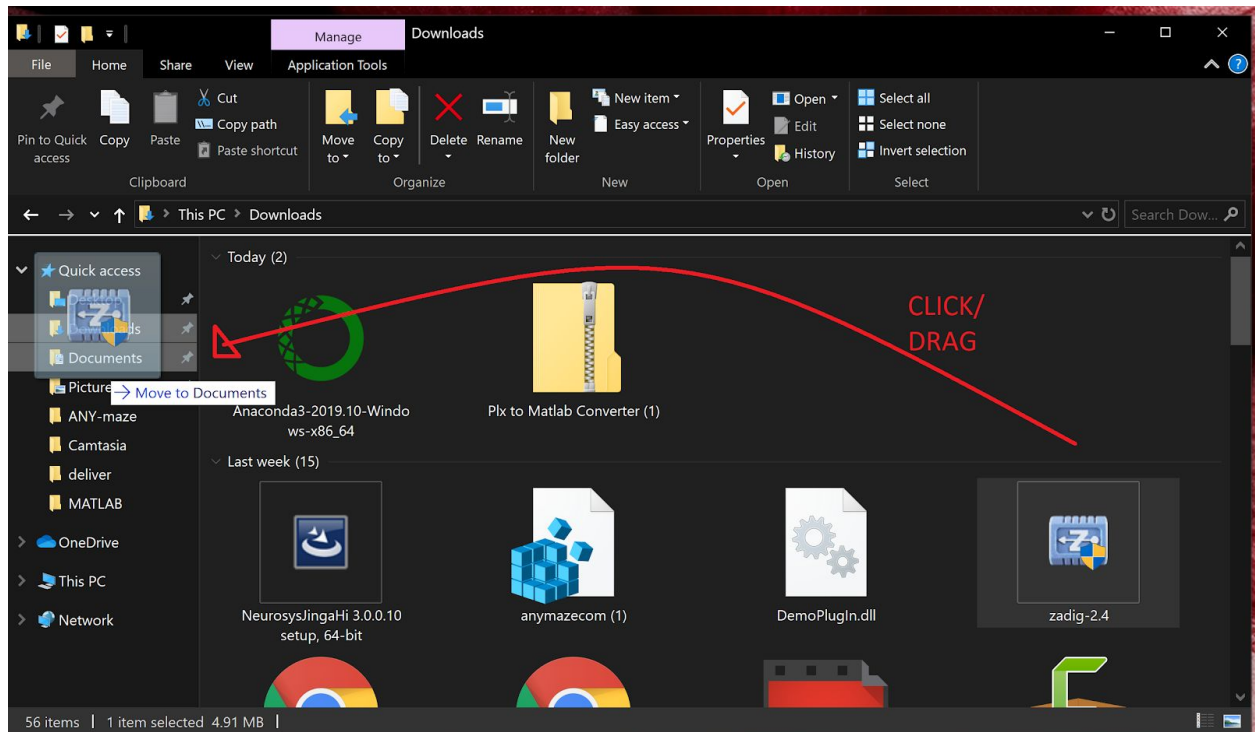

V1.0 - 2020-01

1. DOWNLOAD AND INSTALL ZADIG

Go to the Zadig homepage and download the latest version of the software.

Open the Downloads folder and find the Zadig download. This is not an installer, it is the actual executable program. So, just move it from Downloads into the Documents folder.

In the Documents folder, find Zadig and right-click > Send to > Desktop (create shortcut).
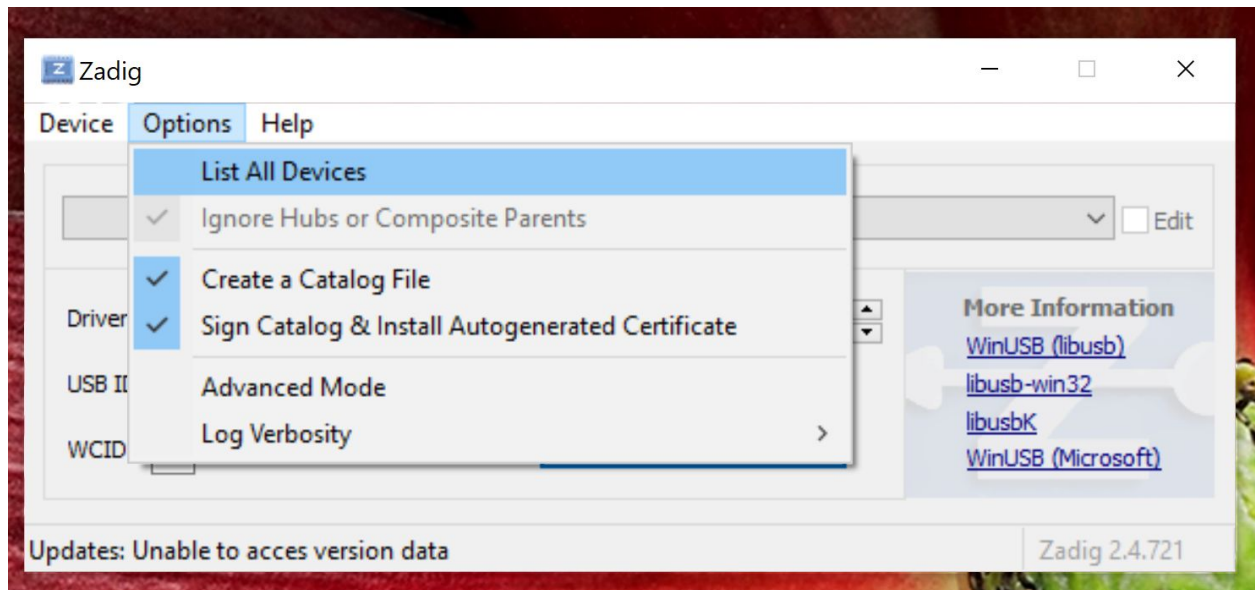

2. INSTALL/CONFIGURE USB DRIVER

Connect the Jaga Penny Receiver to your USB port.

Run Zadig by double-clicking the Desktop icon.

When a Dialog window appears asking "Do you want to allow this app to make changes to your device?" with "Verified publisher: Akeo consulting", click "YES". This allows the App to run as Administrator, which is necessary for it to do the driver installs.
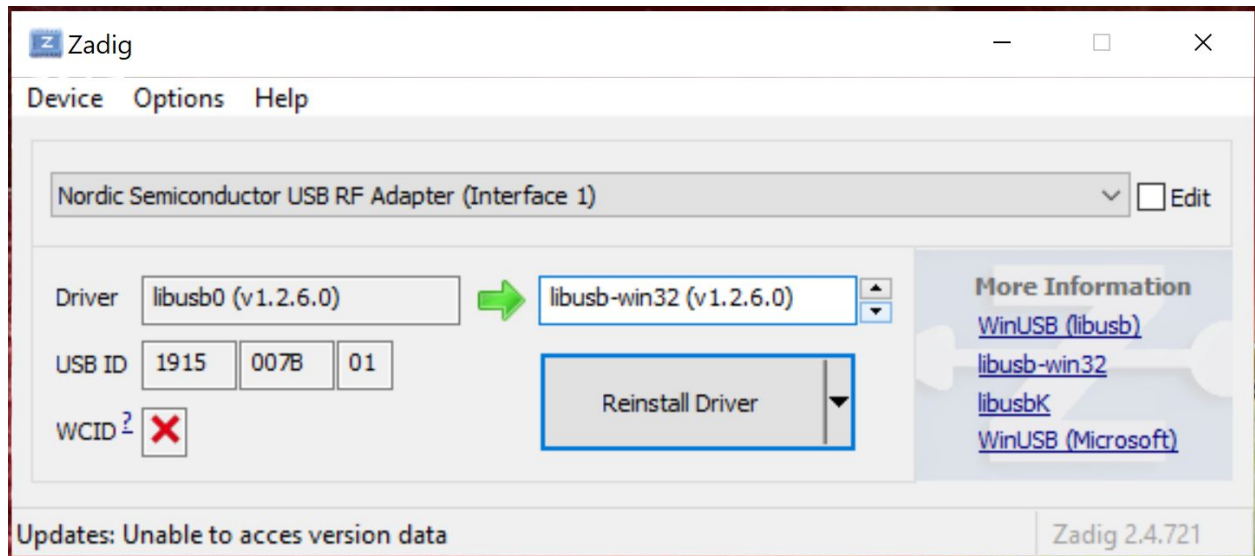

In the Zadig window, select Options > List All Devices.

Expand the drop-down list and select "Nordic Semiconductor USB RF Adapter (Interface 1)"

Once the device is selected, use the up and down arrows to the right to select the libusb-win32 driver, and click on "Replace Driver" or "Reinstall Driver".

Wait for the message "Install finished." Now you can safely quit Zadig.
